

Gram Training Center

Course Description

Basic Knowledge about Process Ventilation

Purpose: To give the participants knowledge about the actual and relevant demands from the authorities for the most common production processes as well as the placing and installation of equipment and installations for these processes.

We will review specific solutions for the single processes including a practical instruction concerning dimensioning and selection of products.

After this course you will be able to understand several production processes and to find the right solution and airflow for the correct extraction of pollution.

Participants: Every one belonging to the business

Content: *During the course you will get a short introduction to V.Å. Gram A/S and the products of the company. After that we focus on the education concerning the overall demands and dimensioning principles about process ventilation:*

- *Information about the relevant authorities and their demands and rules for a correct task solution*
- *Dimensioning and guide lines for channel systems for material transport*
- *Solutions for the most common production processes, where process ventilation is mandatory*
- *Practical demonstration of regulation and equipment in the demo and test rooms at Gram Training Center*

Dates: As required

Duration: Appr. 5 hours plus lunch and eventually a tour through the production units

Course fee: None (lunch included)

Place: All courses are held at Gram Training Center, Lysbjergvej 10, Hammelev, DK-6500 Vojens

Registration: Please contact our Sales department under sales@vaagram.dk
